Experience

Software Engineer, Apple, Cupertino CA — June 2026-Present

Camera API Test Automation Intern, Apple, Cupertino, CA — May 2025-Aug. 2025

- Architected an end-to-end failure-triage pipeline for 1,000+ on-device camera tests per cycle: XML log parsing, failure-signature grouping, and LLM-driven root-cause analysis
- Integrated Gemini for bug deduplication at 75% accuracy, matching new failures against historical bug reports and cutting manual triage time ~48x
- Shipped a multi-threaded bug-report generator with exponential-backoff retry, DB-backed regression analysis, and automated log/attachment handling; daily workflow for 50+ engineers

WTE Tools Engineer, Apple, Santa Clara, CA — June 2024-Nov. 2024

- Built an LLM-powered chat tool and Python package for schema-aware SQL/NoSQL query generation; fine-tuned a custom Gemini model on Vertex AI and exposed it via MCP tool calling to internal data-store workflows
- Designed AWS/GCP CI/CD pipelines (Jenkins, Docker, Spinnaker, Helm) for internal services and remediated multiple security vulnerabilities while modernizing the runtime

At-Home Advisor, Apple, Remote — May 2023-June 2026

- 2x AppleCare Excellence Award (2024, 2025); sustained a 6.87% escalation rate, 15% above average CSAT, and 0.27 min ACW across 2+ years of remote support

Education

The University of Texas at Dallas, Richardson, TX — Aug. 2022-May 2026

- Bachelor of Science in Computer Science

Projects

Autopsy | Repo — April 2026

- Built a TypeScript plugin that streams every agent tool call into a FastAPI service that classifies rejected runs and writes them to a pgvector-backed failure knowledge graph in Postgres
- Designed a preflight ANN-search for the graph that walks it via a 3-hop recursive Postgres CTE, injecting warnings into the agent's system prompt under an 800ms timeout with fail-open behavior

MeteorMate | Frontend Repo | Backend Repo — May 2025-May 2026

- Built the FastAPI + Next.js scaffolding for an 8-person ACM team: Firebase auth + email verification, SQLAlchemy/Alembic migrations, and CI auto-syncing the monorepo to Vercel
- Authored 30+ merged PRs and reviewed 45+ across the stack (~40% of team output), owning auth, email, and deployment infrastructure end-to-end

Skills

Languages: Python, TypeScript, JavaScript, Swift/SwiftUI, C++, SQL, R
Backend & Data: FastAPI, PostgreSQL (+ pgvector), Redis, MongoDB, OpenSearch
AI/ML: LLM Integration, RAG, Function Calling, Fine-tuning, Embeddings, MCP, Gemini / Vertex AI
Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Helm, Terraform, Jenkins, CI/CD

Awards & Affiliations

LA Hacks 2026 - 3rd Overall + Cognition Company Challenge — April 2026
