## Experience

### **At-Home Advisor**, Apple, Remote

May 2023-Present

- Demonstrating the ability to independently research solutions, leading to a 6.87% escalation rate
- Efficiently multitasking the documenting of case notes while troubleshooting with customers, leading to a 0.27 minute ACW (After Call Work) time
- Consistently 15% above department average in customer satisfaction ratings

### **Camera API Test Automation Intern**, Apple, Cupertino, CA

May 2025-Aug. 2025

- Built end-to-end test failure analysis pipeline for 1000+ camera tests with automated XML parsing, LLM root cause analysis, and intelligent grouping to reduce manual triage time
- Integrated Gemini for bug deduplication achieving 75% accuracy in identifying duplicates and speeding up triaging by 4,800%
- Developed multi-threaded bug reporting system with retry logic, database regression analysis, and automated attachments for 50+ engineers

### **WTE Tools Engineer**, Apple, Santa Clara, CA

June 2024-Nov. 2024

- Developed a large language model (LLM)-powered chat platform and Python package for automated generation of SQL and NoSQL queries from natural language inputs
- Designed and integrated web service workflows in AWS/GCP, optimizing performance and scalability, and implementing CI/CD pipelines for streamlined deployments
- Utilized the MVVM architectural pattern to enhance the performance of an iOS log analysis application, enabling real-time display of thousands of events with minimal latency

---

## Education

### **The University of Texas at Dallas**, Richardson, TX

Aug. 2022-May 2026

- **Bachelor of Science in Computer Science**

---

## Projects

### **CSGO2CS2** | [Repo](#)

April 2026-Present

- Building a production Python pipeline that automates porting Counter-Strike custom maps to Counter-Strike 2, achieving 0 compilation warnings across multiple validated workshop maps

### **MeteorMate** | [Frontend Repo](#) | [Backend Repo](#)

May 2025-May 2026

- Led the creation of an AI-driven roommate matching platform for UTD students, overseeing product roadmap, task breakdown, and cross-team coordination to ensure delivery
- Defined, documented, and shaped end-to-end architecture (Next.js/React frontend + Python/FastAPI backend with Postgres + Firebase), establishing clear technical standards for the team

---

## Skills

**Languages & Frameworks:** Python, FastAPI, React, HTML/CSS/JS, SQL, PostgreSQL, Swift, R  
**AI/ML:** LLM Integration, RAG, Function Calling, Model Fine-tuning, Model Context Protocol (MCP)  
**Cloud & DevOps:** GCP, AWS, CI/CD (Docker, JFrog Artifactory, Spinnaker, Kubernetes, Jenkins)

---

## Awards & Affiliations

### **AppleCare Excellence Award** (x2)

July 2024, 2025

- Awarded to the top performing advisors within AppleCare for continued achievement of top metrics

### **Development Lead**, Association for Computing Machinery, UT Dallas

May 2025-May 2026
